About Dataset

Usability ⓘ

7.50

Context

Hand gesture recognition database is presented, composed by a set of near infrared images acquired by the Leap Motion sensor.

Content

The database is composed by 10 different hand-gestures (showed above) that were performed by 10 different subjects (5 men and 5 women).

The database is structured in different folders as:

- /00 (subject with identifier 00)
 - /01_palm (images for palm gesture of subject 00)
